

## **Color-Blindness Sensitivity Web-Site Evaluation**

Many hospitals and hospital systems require color-blindness screening for all of those healthcare professionals working in their facilities. MedStaff recommends the website <http://www.geocities.com/Heartland/8833/coloreye.html> to evaluate their healthcare professionals for color blindness.

- I attest that I have successfully passed the color blindness web-site evaluation recommended by MedStaff.
  
- I am aware that I did not successfully pass the color-blindness web-site evaluation recommended by MedStaff. I further understand and agree to disclose to all facilities that I may require assistance in evaluating any color sensitive diagnosis should I be asked while on assignment with MedStaff. In addition, I give MedStaff permission to disclose to the facility that I did not pass the web-site color-blindness evaluation and that I may require assistance in evaluating any color sensitive diagnosis should I be asked while on assignment with MedStaff.
